

ATTENTION All IBS Users ...

New MOVE MANAGEMENT SOFTWARE

from **DIRECT**
SYSTEMS, INC.

Development is currently underway on a completely new Move Management system, which will utilize the latest Internet & Microsoft technology including ASP.Net and SQL server. The new system will incorporate the best of your Sales Lead Tracker, Move Task Manager and Customer Service Dispatch modules.

In addition, there will be many entirely new features, including connectivity with Palm Handhelds and other PDA's from **IGC Software** for complete, single-entry Estimating and Rating. (This cooperative effort between **Direct** and **IGC** further solidifies an expanding relationship between the M&S industry's two leading software providers).

In conjunction with the development of the new Move Management system, we want your input. What features would make business easier – and more profitable – for you and your staff?

Initial concentration is on the Customer Service, Dispatch and Billing segments of the Move Management system. However, we are soliciting your ideas on all other areas of the system for our future consideration. Your assistance will be invaluable as we continue to improve on the industry's premier Software for Movers.

Email **sean@directsystems.com** with your specific thoughts and suggestions. If you would like to discuss our project in more detail, feel free to give me a call. **(804-320-2040)**
